

IN THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims**Claims 1-26 (Cancelled)**

Claim 27 (Currently amended) A connection apparatus for connecting with a remote site, comprising:

moving means for moving a part;

input means for inputting an output from a device used for detecting information for positioning a the part; and

transmission means for transmitting to the remote site data in accordance with the output, wherein the data is used as identification in connection with the remote site.

Claim 28 (Previously presented) A connection apparatus according to claim 27, wherein said transmission means transmits the data and a GPS signal.

Claims 29-33 (Cancelled)

Claim 34 (Currently amended) A connection method for connecting with a remote site, comprising:

a step of moving a part;

an input step of inputting an output from a device used for detecting information for positioning a the part; and

a transmission step of transmitting to the remote site data in accordance with the output, wherein the data is used as identification in connection with the remote site.

Claim 35 (Previously presented) A connection method according to claim 34, wherein the data

and a GPS signal is transmitted at said transmission step.

Claims 36-39 (Cancelled)

Claim 40 (Currently Amended) A connection program stored on a computer readable medium for controlling a connection apparatus connecting with a remote site, comprising:

a step of moving a part;

an input step of inputting an output from a device used for detecting information for positioning a the part; and

a transmission step of transmitting to the remote site data in accordance with the output, wherein the data is used as identification in connection with the remote site.

Claim 41 (Previously presented) A connection program according to claim 40, wherein the data and a GPS signal is transmitted at said transmission step.
